

$$140 \div 9 = 15 \cdots 5 \quad (\bigcirc) \quad 268 \div 8 = 33 \cdots 4 \quad (\quad)$$

① $15 \times 9 = 135$

② $135 + 5 = 140$

③ 140은 나누어지는 수(140)와 같으므로
나눗셈 계산이 맞다.

$$199 \div 7 = 28 \cdots 3 \quad (\quad) \quad 506 \div 6 = 84 \cdots 2 \quad (\quad)$$

$$323 \div 5 = 64 \cdots 3 \quad (\quad) \quad 237 \div 4 = 59 \cdots 1 \quad (\quad)$$

$$937 \div 3 = 312 \cdots 1 \quad (\quad) \quad 905 \div 2 = 457 \cdots 1 \quad (\quad)$$

정답
