

$$\frac{1}{3} + \frac{1}{3} = \frac{2}{3}$$

$$\frac{2}{3} - \frac{1}{3}$$

$$4 - \frac{1}{3}$$

$$1\frac{1}{3} + \frac{2}{3}$$

$$2\frac{1}{3} - 1\frac{2}{3}$$

$$10 - 5\frac{1}{3}$$

$$5\frac{1}{3} - 4\frac{2}{3}$$

$$\frac{1}{3} + 3\frac{2}{3}$$

$$4\frac{2}{3} + 2\frac{2}{3}$$

$$\frac{2}{4} + \frac{1}{4}$$

$$\frac{3}{4} - \frac{2}{4}$$

$$3 + \frac{1}{4}$$

$$7 - 1\frac{1}{4}$$

$$1\frac{3}{4} + 2\frac{2}{4}$$

$$5\frac{1}{4} - 3\frac{3}{4}$$

$$4\frac{3}{4} + 1\frac{1}{4}$$

$$6\frac{1}{4} - 5\frac{2}{4}$$

$$\frac{1}{4} + 1\frac{3}{4}$$

정답
