

$$1\frac{1}{4} + 2\frac{4}{5}$$

$$= 1\frac{5}{20} + 2\frac{16}{20} = 4\frac{1}{20}$$

$$3\frac{1}{3} - 1\frac{1}{2}$$

$$4\frac{1}{4} + 4\frac{5}{7}$$

$$5\frac{1}{6} - 2\frac{3}{4}$$

$$\frac{5}{6} + 1\frac{5}{9}$$

$$2\frac{3}{4} - 2\frac{3}{10}$$

$$3\frac{2}{3} + 3\frac{4}{9}$$

$$4\frac{5}{9} - 1\frac{11}{15}$$

$$7\frac{1}{2} + \frac{3}{4}$$

$$7\frac{1}{6} - 6\frac{7}{18}$$

$$1\frac{5}{12} + 5\frac{3}{10}$$

$$6\frac{2}{7} - 4\frac{2}{3}$$

정답
