

$$1\frac{1}{2} \times 1\frac{2}{3} = \frac{\cancel{3}^1}{2} \times \frac{5}{\cancel{3}_1} = \frac{5}{2} = 2\frac{1}{2}$$

$$3\frac{1}{5} \times 3\frac{3}{4}$$

$$2\frac{1}{3} \times 2\frac{1}{7}$$

$$1\frac{3}{8} \times 2\frac{2}{7}$$

$$1\frac{1}{9} \times 4\frac{1}{5}$$

$$2\frac{1}{6} \times 3\frac{3}{5}$$

$$3\frac{1}{4} \times 2\frac{1}{2}$$

$$4\frac{1}{5} \times 3\frac{1}{3}$$

$$2\frac{3}{8} \times 3\frac{7}{11}$$

$$2\frac{2}{11} \times 5\frac{1}{2}$$

$$1\frac{3}{5} \times 6\frac{1}{2}$$

정답
