

① ()가 있으면 ()를 가장 먼저 계산합니다.

② 그 다음에 곱셈, 나눗셈을 앞에서부터 차례로 계산합니다.

③ 그 다음에 덧셈, 뺄셈을 앞에서부터 차례로 계산합니다.

$$56 \div 4 - 2 = 12$$

Diagram showing the calculation order for $56 \div 4 - 2 = 12$. A bracket under $56 \div 4$ is labeled '14'. A larger bracket under the entire expression $56 \div 4 - 2$ is labeled '12'.

$$56 \div (4 - 2) = 28$$

Diagram showing the calculation order for $56 \div (4 - 2) = 28$. A bracket under $4 - 2$ is labeled '2'. A larger bracket under the entire expression $56 \div (4 - 2)$ is labeled '28'.

$$80 \div 20 - 4$$

$$80 \div (20 - 4)$$

$$96 \div 12 - 6$$

$$96 \div (12 - 6)$$

$$100 \div 10 - 5$$

$$100 \div (10 - 5)$$

$$128 \div 16 - 8$$

$$128 \div (16 - 8)$$

$$91 \div 13 - 6$$

$$91 \div (13 - 6)$$
