

$$\begin{aligned}
 & 3 \times 1\frac{1}{3} \\
 &= 3 \times \frac{4}{3} \\
 &= \frac{3 \times 4}{3} = \frac{12}{3} = 4
 \end{aligned}$$

처음부터 약분하여 계산할 수도 있습니다. $3 \times 1\frac{1}{3} = \cancel{3}^1 \times \frac{4}{\cancel{3}_1} = 4$

$3 \times 1\frac{2}{3}$

$3 \times 2\frac{1}{3}$

$3 \times 1\frac{1}{4}$

$3 \times 2\frac{3}{4}$

$3 \times 2\frac{1}{5}$

$3 \times 2\frac{4}{5}$

$3 \times 3\frac{1}{6}$

$3 \times 3\frac{5}{6}$

$6 \times 1\frac{1}{3}$

$6 \times 2\frac{2}{3}$
