

처음부터 약분하여 계산할 수도 있습니다. $4 \times 1\frac{1}{2} = \cancel{4}^2 \times \frac{3}{\cancel{2}_1} = 6$

$$4 \times 1\frac{1}{3}$$

$$4 \times 1\frac{2}{3}$$

$$4 \times 2\frac{1}{3}$$

$$4 \times 2\frac{2}{3}$$

$$4 \times 2\frac{1}{5}$$

$$4 \times 3\frac{2}{5}$$

$$4 \times 3\frac{1}{4}$$

$$4 \times 1\frac{3}{4}$$

$$8 \times 2\frac{1}{6}$$

$$8 \times 1\frac{5}{6}$$
