

$$\begin{array}{c}
 5 \times 6 = 30 \\
 \begin{array}{c}
 \text{8이 } \frac{1}{10} \text{배가 되면} \\
 \downarrow \\
 5 \times 0.6 = 3.0 \rightarrow 3
 \end{array}
 \end{array}$$

30이 $\frac{1}{10}$ 배가 된다

$$\begin{aligned}
 5 \times 0.6 &= 5 \times \frac{6}{10} \\
 &= \frac{30}{10} \\
 &= 3
 \end{aligned}$$

$4 \times 0.2 = 0.8$
